## RECREATION STUDY PLAN

### STEVENS CREEK HYDROELECTRIC PROJECT (FERC No. 2535)

DOMINION ENERGY SOUTH CAROLINA, INC.

## 1.0 INTRODUCTION

---

Dominion Energy South Carolina, Inc. (DESC) is the licensee of the Stevens Creek Hydroelectric Project (FERC No. 2535) (Project). The Project, which has an installed capacity of 17.28 megawatts (MW), is located in Edgefield and McCormick counties, South Carolina and Columbia County, Georgia, at the confluence of Stevens Creek and the Savannah River. The Project's dam is located approximately one mile upstream of the Augusta Diversion Dam, and approximately 13 miles downstream of the J. Strom Thurmond Dam. The Project occupies approximately 104 acres of federal lands within the Sumter National Forest, with three existing Project recreation sites located on federal land and managed through agreement with the U.S. Forest Service (Forest Service).

## 2.0 PURPOSE OF THE STUDY

---

On November 22, 1995, FERC issued a 30-year license which is scheduled to expire on October 31, 2025. DESC intends to file an application for a new license with FERC on or before October 31, 2023. The Project is currently involved in a relicensing process which involves cooperation and collaboration between DESC, as licensee, and a variety of stakeholders including state and federal resource agencies, state and local government, non-governmental organizations (NGO), and interested individuals. DESC established a Recreation and Land Management Resource Conservation Group (RCG), with interested stakeholders to address Project issues related to recreation and land management. The RCG determined there was a need for a recreation study at the Project.

DESC is proposing to perform an assessment of existing and future recreational use, opportunities, and needs for the Project. The assessment is designed to provide information pertinent to the current and future availability and adequacy of DESC-owned and managed recreation sites, Forest Service owned and managed recreation sites, and Columbia County, Georgia owned and managed recreation sites at the Project. The overall study plan objective is to identify current and potential recreation opportunities, use, and needs at the Project by addressing the specific goals and objectives listed below. Results from the study will be used to develop a new Recreation Management Plan (RMP) for the Project.

Goal 1: *Characterize the existing use of recreation sites at the Project. This will be accomplished by meeting the following objectives:*

- i. Identify recreation sites; inventory the services and facilities offered; and assess the general condition of each site (including whether the site provides barrier free access).
- ii. Identify patterns of use at each site (type, volume, and daily patterns of use).
- iii. Assess existing recreation sites located on federal land for consistency with Forest Service Sustainable Recreation Strategy.

Goal 2: *Identify future needs relating to public recreation sites at the Project. This will be accomplished by meeting the following objectives:*

- i. Identify existing user needs and preferences, including perceptions of crowding at recreation sites.
- ii. Estimate future recreation use of existing recreation sites.
- iii. Identify future needs for new recreation sites and facilities.

### 3.0 STUDY AREA

---

Recreation sites at the Project that will be included in this study are listed in Table 3-1 and shown in Figure 3-1.

**TABLE 3-1 EXISTING PROJECT RECREATION SITES AT THE STEVENS CREEK PROJECT<sup>1</sup>**

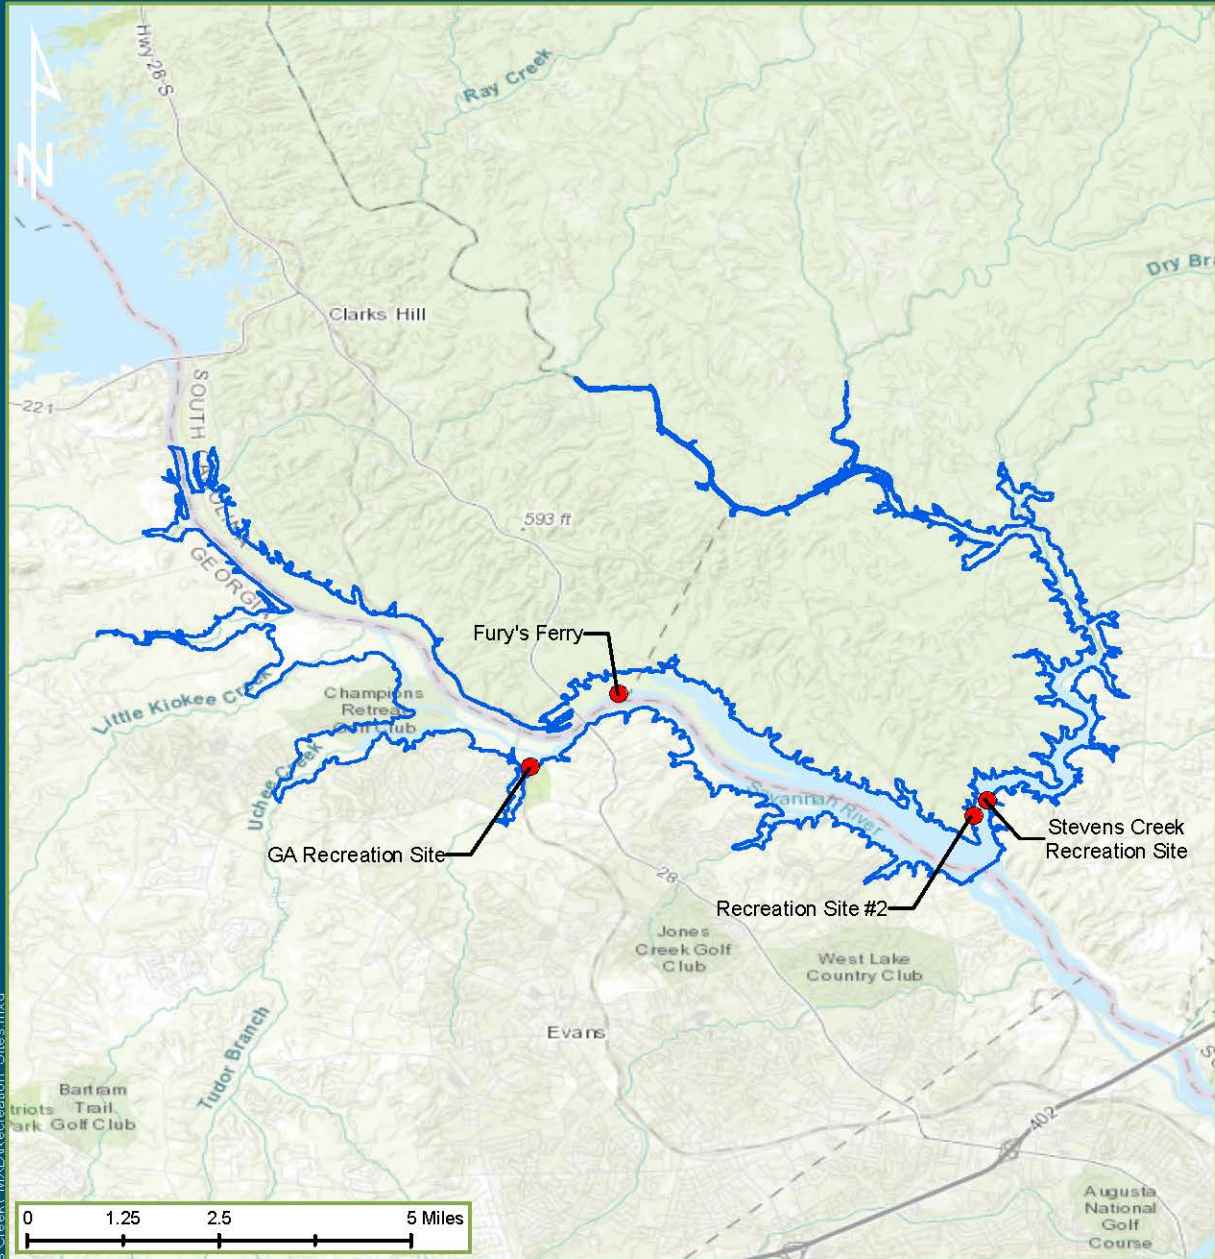

<b>RECREATION SITE NAME</b>	<b>RECREATION SITE NAME AS LISTED IN 2014 RECREATION PLAN</b>	<b>RECREATION SITE NAME AS LISTED IN 1995 PROJECT LICENSE/EXHIBIT G DRAWINGS</b>	<b>RECREATION SITE OWNER/MANAGER</b>
Stevens Creek Recreation Site	SC Recreation Site #1	Stevens Creek Recreation Site	DESC
Fury's Ferry Recreation Site	SC Recreation Site #2	Fury's Ferry Recreation Site	Forest Service
Chota Drive Recreation Site	SC Recreation Site #4	Recreation Site #2	Forest Service
Betty's Branch/Riverside Park	SC Recreation Site #5	GA Recreation Site	Columbia County, GA

Source: SCE&G 2014

---

<sup>1</sup> The 2014 Recreation Management Plan (RMP) includes an additional recreation site – Stevens Creek Recreation Site #3 (also known as Recreation Site #1 or the Mims Recreation Site). This site is located on Forest Service property and is maintained by the Forest Service. The Forest Service has decided that this recreation site is not in line with their Sustainable Recreation Strategy and will no longer be supported by the Forest Service. The Forest Service has asked that this site be removed from the RMP and therefore not be studied during relicensing.

## 4.0 STUDY SEASON

---

Generally, the study season will last for one year, beginning on April 1, 2021 and ending on March 31, 2022. During this time, traffic counters will be deployed at all four recreation sites, collecting continuous data for one full year. Within this general study season, recreation user surveys and spot counts will be collected during the peak recreation season, from April 1, 2021 through Labor Day weekend or September 6, 2021.

## 5.0 DATA COLLECTION METHODS

---

A variety of data collection techniques will be used to obtain the information necessary to meet the study objectives and goals listed in Section 2.0. Both primary and secondary data will be collected. Primary data will entail site inventories, spot counts, traffic counter data, and recreation user surveys. Primary data will be collected at each site as shown in Table 5-1.

**TABLE 5-1 DATA COLLECTION METHODS AT STEVENS CREEK RECREATION SITES**

RECREATION SITE	DATA COLLECTION METHOD			
	SITE INVENTORY	SPOT COUNT <sup>2</sup>	TRAFFIC COUNTER DATA	RECREATION USER SURVEYS <sup>3</sup>
Stevens Creek Recreation Site	*	*	*	*
Fury's Ferry Recreation Site	*	<i>Periodic</i>	*	<i>Periodic</i>
Chota Drive Recreation Site	*	<i>Periodic</i>	*	<i>Periodic</i>
Betty's Branch/ Riverside Park	*	*	*	*

Secondary data will include U.S. Bureau of Census data, the South Carolina Statewide Comprehensive Outdoor Recreation Plan (SCORP), SC Recreation Participation & Preference Study, US Army Corps of Engineers (USACE) existing recreation data collected at the J. Strom

---

<sup>2</sup> Spot counts will be administered at Fury's Ferry and Chota Drive during traffic counter data download events.

<sup>3</sup> Recreation user surveys will be administered at Fury's Ferry and Chota Drive if recreation users are present during traffic counter data download events.

Thurmond (Thurmond) Project, and other relevant, readily available literature. Additional input will be solicited from the RCG, Columbia County, and Forest Service. Table 5-2 summarizes the study objectives, information needed to meet these objectives, and sources for information. Sections 5.1 through 5.4 summarize the primary data collection methods.

**TABLE 5-2 RECREATION USE AND NEEDS STUDY PLAN OBJECTIVES AND EFFORTS**

OBJECTIVES	INFORMATION NEEDED	SOURCE
<i>Goal 1: Characterize existing recreational use of Project recreation sites</i>		
Goal 1a: Identify formal recreation sites, inventory the services and facilities offered at each, and assess the general condition and ADA compliance of each site	<ul style="list-style-type: none"> <li>• Physical inventory of all facilities at each recreation site</li> <li>• General assessment of site condition to include maintenance, basic rehabilitation needs, etc.</li> <li>• Visitors’ assessment of site conditions</li> <li>• Identification of activities that occur at each site</li> <li>• Barrier free/ADA compliance assessment</li> </ul>	<ul style="list-style-type: none"> <li>• Recreation Site Inventory</li> <li>• Recreation User Surveys</li> </ul>
Goal 1b: Identify the patterns of use at each site (type, volume, and daily patterns of use)	<ul style="list-style-type: none"> <li>• Utilize vehicle counts as an estimation of people</li> <li>• Estimate of # people/vehicle</li> <li>• Estimate of # vehicles/site</li> <li>• Parking capacity</li> </ul>	<ul style="list-style-type: none"> <li>• Traffic Counter Data</li> <li>• Spot Count Data</li> <li>• Recreation User Surveys - # of people per vehicle and length of visit</li> <li>• Recreation Site Inventory - # of parking spaces</li> <li>• Columbia County/Forest Service data, if available</li> </ul>
Goal 1c: Assess existing recreation sites located on federal land for consistency with Forest Service Sustainable Recreation Strategy.	<ul style="list-style-type: none"> <li>• Results from Goal 1a and Goal 1b for recreation sites located on federal land</li> </ul>	<ul style="list-style-type: none"> <li>• Forest Service input</li> <li>• Forest Service Sustainable Recreation Strategy</li> </ul>

OBJECTIVES	INFORMATION NEEDED	SOURCE
<i>Goal 2: Identify future recreational needs at the Project</i>		
Goal 2a: Identify existing user needs and preferences, including perceptions of crowding at Project recreation sites	<ul style="list-style-type: none"> <li>• User preferences and opinions of needs and crowding at sites</li> <li>• Condition assessment</li> </ul>	<ul style="list-style-type: none"> <li>• Recreation User Surveys</li> <li>• Recreation Site Inventory</li> </ul>

OBJECTIVES	INFORMATION NEEDED	SOURCE
Goal 2b: Estimate future recreation use of existing Project recreation sites	<ul style="list-style-type: none"> <li>• Inventory and use data</li> <li>• Population projections for the project area</li> <li>• Recreational use trends</li> </ul>	<ul style="list-style-type: none"> <li>• Results of Goal 1</li> <li>• U.S. Bureau of Census Data</li> <li>• SC Division of Research &amp; Statistics (Budget and Control Board)</li> <li>• SCORP, SC Recreation Participation &amp; Preference Study, or other readily available literature</li> <li>• USACE recreation data from Thurmond Project</li> </ul>
Goal 2c: Identify future needs for new recreation sites and/or facilities	<ul style="list-style-type: none"> <li>• Estimate of future recreation use at the Project</li> <li>• Parking capacity at recreation sites vs. existing and projected use density</li> <li>• Condition/perception assessment</li> </ul>	<ul style="list-style-type: none"> <li>• Results of Goal 1a, 1b, 2a, 2b,</li> <li>• Columbia County, USFS, and RCG input on future needs</li> </ul>

## **5.1 RECREATION SITE INVENTORY**

Prior to completion of a recreation site inventory, GPS points and land area of each recreation site will be collected and recorded. Then a recreation site inventory will be completed for each recreation site included in Table 3-1. A site visit will be made to collect data on the type, number, and size of facilities (restrooms, parking areas, boat ramps, picnic shelters and tables, etc.) located at each site. The general condition of all recreation facilities will be noted during the inventory. In addition, any facilities that qualify as barrier free will be identified as such. A copy of the inventory form is provided in Appendix A.

Upon completion of the inventory, all data will be uploaded into an Excel database. The database will be structured so that it can be used in a variety of formats (brochure, maps, web pages, etc.) and can be updated as recreation sites are modified, added, or changed in any way.

## **5.2 TRAFFIC COUNTS**

Traffic counters will be installed at all recreation sites included in Table 3-1 to record the number of vehicles that enter and exit the public recreation areas. Traffic count data will be collected for one year in order to capture use during the various seasons. Counters will be installed by April 1, 2021 and will collect data through March 31, 2022. Traffic counter data will be downloaded from the counter at a minimum of twice per month to ensure the counter is working properly and to minimize the potential for lost data.

## **5.3 RECREATION USER SURVEYS**

The preferences and perceptions of people using Project recreation sites weigh heavily into the determination of need for recreation site improvements and/or new recreation sites. Information from recreation site users will be collected through on-site surveys. Surveys will be conducted at recreation sites as shown in Table 5-1. Surveys may be collected at Chota Drive Recreation Site and Fury's Ferry Recreation Site when traffic counter data is downloaded. However, a recreation clerk will not be stationed at these sites.

Surveys will be administered to recreation site users at the close of their recreation day<sup>4</sup>. Data collected will include user demographics, group size, the type of land-based and water-based recreation activities individuals are participating in, length of stay, and perceptions of crowdedness and condition of recreation facilities at the Project. The data collected will be used to identify recreation use patterns and use estimates at the recreation sites. The data will also characterize user perceptions on crowdedness, which will be considered during the future needs analysis. Due to a large Hispanic population in the Project area, surveys will also be available in Spanish, and administered to those recreators that indicate Spanish as their primary language.

The survey will be pre-tested in the field prior to implementation and revisions will be incorporated, as necessary. If any significant revisions to the survey or study protocol are deemed necessary following field pre-testing, the RCG will be notified. A copy of the survey is provided in Appendix B.

Surveys will be administered during the peak recreation season from April 1 through Labor Day weekend, 2021. Each recreation site will be sampled according to a sampling plan that will be prepared in consultation with the RCG. Sampling days will include weekdays, weekends and peak use weekends<sup>5</sup>. The sampling plan will be developed using a stratified random sampling method, with weekends being sampled at a greater rate than weekdays to account for the heavier use that typically occurs on these days. During each sampling day, survey clerks will be on-site for a four-hour shift, collecting as many complete surveys as possible. The shifts will occur randomly throughout the day within the window of 7:00 AM to 8:00 PM. Shift start times will be listed in the sampling plan.

All survey clerks will be trained thoroughly as a means of quality control. Survey clerks will be provided with detailed information on the study schedule, appropriate materials to aid in data collection, and direction on appropriate interviewing techniques and attire. Interviewers will also be provided with an incentive for survey respondents to complete the survey.

---

<sup>4</sup> FERC defines a recreation day as a visit by a person to a development for recreational purposes during any portion of a 24-hour period.

<sup>5</sup> FERC defined peak use weekends as weekends when recreation use is at its peak for the season (typically Memorial Day, Independence Day and Labor Day). All three days in a holiday weekend should be included.

## **5.4 SPOT COUNTS**

Spot counts will be conducted at the recreation sites listed in Table 3-1 once per sampling day, prior to the start of survey collection. Spot counts will document the number of vehicles present at a recreation site at one moment in time. Information recorded during spot counts will include: date, time, and weather; number of vehicles and vehicles with trailer at recreation site; type of activities observed at the site; and state license plate data (Appendix C). Spot count data will be used in parallel with traffic counter data. Spot counts will only be collected at Chota Drive Recreation Site and Fury's Ferry Recreation Site when traffic counter data is downloaded. However, a recreation clerk will not be stationed at these sites.

## **6.0 ANALYSIS**

---

The following sections provide a description of the approach for estimating existing and future recreational use, recreation site capacity and use density percentages, and future recreation needs.

### **6.1 CURRENT RECREATION USE ESTIMATES**

The reported estimates of recreation will be presented in "recreation days". The FERC defines a recreation day as one visit by a person to a development for purposes of recreation during any 24-hour period. The weekday, weekend, and peak weekend average recreation days will be calculated for each recreation site utilizing the traffic counters and recreation site survey data. The average number of people at each site within the morning and afternoon periods will be estimated within each day type and converted to a daily estimate. Daily estimates for each day type will be expanded to represent the study period and summed for a total estimate for each recreation site.

### **6.2 FUTURE RECREATION USE ESTIMATES**

Estimated projections of future recreation use at the Project will be developed using the average annual increase in population growth over the past 10 years, as reported by the Census Bureau or the State Division of Research and Statistics, for Edgefield and McCormick counties, SC and

Columbia County, GA. The estimates will be augmented with discussion of trends reported in the SCORP (2014) and the SC Recreation Participation & Preference Study (2005). Estimated projections will be provided in 5-year intervals for the anticipated term of the license up to 50 years into the future (through year 2075).

While it is acknowledged that future changes in the supply of recreation resources, either in their quantity, accessibility, and/or quality may influence future demand and use, the demand analysis undertaken for this study does not attempt to predict what these future changes might consist of or how they might specifically affect levels of use at Project facilities. Therefore, the demand analysis results should be viewed as a general guide of potential future recreation pressure developed for planning purposes only.

### **6.3 RECREATION SITE CAPACITY**

For purposes of this study, the carrying capacity for a recreation site is defined as the number of vehicles and boat trailers that can be parked at a recreation site at one time, based on the number of available parking spaces associated with each site. For paved parking areas, this will be achieved by counting the number of designated parking spaces available at the recreation site. For gravel parking areas, the number of available parking spaces for each recreation site will be estimated by measuring the area (sq ft) available for parking and estimating the number of vehicles that could be parked at the location, if optimal space were utilized. These estimates will be based on parking capacity standards for vehicle length, width, and available turn around space.

### **6.4 RECREATION SITE USE DENSITY**

The use density of recreation sites will be estimated by comparing the average observed number of vehicles at the sites on sampled weekday, weekend, and peak weekend days with the available parking capacity for each recreation site. The average observed number of vehicles divided by the parking capacity will provide an estimated use density for each site. The average number of vehicles at the site will be determined using spot count and traffic counter data.

## 6.5 RECREATION NEEDS ASSESSMENT

The need for recreation and site development or modification of existing recreation resources will be assessed based on the inventory, condition assessment results, parking capacity and use density assessment results, user survey results, and Forest Service consultation. The needs assessment will focus on the existing condition and user opinions of recreation sites, the presence of "barrier free" facilities at recreation sites, and the ability of sites to meet current and anticipated future recreation demand. Consideration will also be given to site opportunities and constraints, as well as support facilities such as signage and maintenance. The need for new recreation sites and/or facilities will be determined through assessment of the information collected and the input of stakeholders through the RCG and the Forest Service.

## 7.0 SCHEDULE

---

The proposed schedule for completion of the Recreation Use and Needs Study is as follows:

TASK	DATE
Mobilization for field work (includes field clerk hiring, training, etc.)	March 2021
User survey pre-testing	March 2021
Installation of traffic counters	April 1, 2021
Traffic counter data collection	April 1, 2021 – March 31, 2022
User survey collection	April 1 - September 6, 2021
Preliminary data entry, cleaning, and processing	October 2021
Conduct analyses	April-May 2022
Submit draft report	July 2022
Determine if additional data collection is needed	July 2022 <sup>6</sup>
Finalize report	August 2022
